CHANGE THE GAME

Succeedin's vision is to revolutionise the education sector right from grass roots into further & higher education.

We are doing this by providing an online platform containing a range of simple to use **Planning, Delivery & Measurement** tools that enable improvement and consistency of PE across all year groups.

If you want to empower teachers & coaches with confidence, create an impact & make a difference to the pupil's PE experience and improve staff work life balance and more, then contact Succeedin and drive positive change: t: **0845 467 7766** w: **succeedin.co.uk** e: **intheknow@succeedin.co.uk**

Overview of the Platforms Features

- Progression & attainment
- Pre-planned curriculum
- Reporting on individual pupils
- Video content, diagrams & editable plans
- Able & Talented content
- CPD reporting
- Online sharing of documents

Benefits

- Saves time
- Reduces effort
- Develops skills
- Builds confidence
- Reports & measures
- Creates sustainability
- Drives consistency
- Encourages participation
- Improves quality
- Reduces costs

Primary

Physical Education is a fundamental part of every child's primary experience and individual development. At Succeedin we want to help you ensure that the experience is the best that they can possibly have, as it is our belief that every pupil should have the opportunity to experience a PE curriculum that engages and motivates them.

We have taken the time to research and understand the needs of a primary school teacher to build a set of tools and resources that ensure that their ability to deliver PE is maximised and that they are able to teach PE with confidence.

To achieve this our team of education specialists within have built an online platform that puts the needs of the pupil, teacher and school at the heart of the syllabus.

Our lesson and curriculum planning tools will help every teacher to save time, build confidence and allow students to develop their health-related fitness, physical competence in movement activities and cognitive understanding. In doing so encouraging positive attitudes toward physical activity and the adoption of a healthy and active lifestyle.

- Plan:** Simple and effective tools to plan a full PE curriculum map, timetable and detailed lesson planning.
- Deliver:** Visual and engaging multimedia content for you and your students to deliver effective and enjoyable PE lessons.
- Measure:** Capture results, simply, effectively – when and where you want to. Track progress, prove impact.

Secondary

We have researched & developed a secondary school platform offering that will take basic schemes of work and turn them into visual, dynamic plans with the ability to add video content to support every students learning style. This holistic approach is aimed at engaging and inspiring every pupil to lead a healthy lifestyle beyond their education.

Secondary school PE teachers have a wealth of knowledge when delivering Physical Education, reinforced with carefully planned schemes of work that support the development of students on their journey through secondary education. Succeedin supports that journey by providing a platform for PE teachers to upload and share their content with staff and students alike.

Our software also allows the teachers to present the lesson to the students and the students to take ownership of their learning. This, combined with our reporting structure for real-time progression and attainment measurement tracking, can help both the teacher and students build a portfolio of information about their PE journey.

- Plan:** Upload, plan and edit your schemes of work on our platform.
- Deliver:** Here the lessons can become pupil lead, with peer leading and pupil conferencing at the heart of delivery.
- Measure:** Build a pupil profile that supports their secondary journey.

Further & Higher

The transition from secondary school to college & university requires students who have a passion for PE & sport to be able to store and re-evaluate their ideas. We offer students the opportunity to share lessons/sessions that will allow them to experience and learn the importance of planning and preparation.

Our system allows tutors and students to share content, lesson plans and sport related documents. Within our platform colleges and universities can have a centralised area dedicated to the development of every student.

Tutors are able to review lesson plans at the click of a button. Students can amend their planning, evaluate and review to ensure that their learning is progressive and offers continual development.

Working in the community and local education students can feel assured that their lesson plans are able to be viewed on the move and shared in schools to show the detail and preparation that has been put into their content.

- Plan:** Having your lessons at the touch of a button to support your delivery. Planning your sessions will allow you to focus on clear learning outcomes.
- Deliver:** Supporting students through their planning, they can refer to lessons to support outstanding delivery as part of their education.
- Measure:** Student Self Evaluation allows the lecturer and student to re-visit and reflect on plans, discuss, amend and save at the click of a button.

Coaching

Working with schools to support the development of PE is an enormous responsibility. Succeedin can provide your coaching organisation with the ability to upload your schemes of work into our online platform, where you can add video content, diagrams and text to support both teachers and students and deliver real additional value into your services.

Having a platform that is online allows your coaching team to access lessons in the office, at school and in the staff room. At the same time senior members of your staff are able to view when lessons are planned and viewed to ensure quality and consistency across your portfolio of services and customers.

Schools trust coaching organisations with the development of their students and use of our system will help to put your schools minds at ease. Being able to share content with teachers and evaluate students learning is an effective way to ensure the progression of students and the delivery of your service.

- Plan:** Support schools with your curriculum on our online platform. We want to enhance your delivery and look to sessions.
- Deliver:** Deliver lessons that start in the class room. We know children and students have different learning styles, your online lessons and video content can support their learning.
- Measure:** Our platform will support schools and measure the students through coaching companies. Help schools to meet the requirements of Ofsted or equivalent body.
